

MANETH NANAYAKKARA

INFORMATION TECHNOLOGY UNDERGRADUATE | SOFTWARE DEVELOPMENT INTERN

Ihala Walakumbura, Alawwa, Sri Lanka | +94 70 147 2511 | manethnanayakkara78@gmail.com | GitHub | LinkedIn

PROFILE

Information Technology undergraduate with hands-on experience in full-stack web, mobile and embedded-system development. Familiar with REST APIs, MVC and 3-tier architecture, role-based access, databases, cloud deployment and AWS fundamentals. Seeking a software engineering or cloud internship.

EDUCATION

BSc (Hons) in Information Technology

Sri Lanka Institute of Information Technology (SLIIT)

Specialising in Information Technology

G.C.E. Advanced Level - 2023

Physical Science Stream

G.C.E. Ordinary Level - 2019

Sri Rahula Central College, Alawwa

CERTIFICATION

AWS Cloud Practitioner (CLF-C02)

In Progress

Cloud concepts, IAM, EC2, S3, RDS, Lambda, VPC and CloudWatch

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS, Embedded C/C++

Frameworks: React.js, React Native, Node.js, Spring Boot, Expo

Databases: MySQL, SQL, MongoDB

Cloud & Tools: AWS fundamentals, Railway, Git, GitHub, IntelliJ IDEA

Networking: TCP/IP, HTTP, HTTPS, DNS

PROFESSIONAL SKILLS

Leadership | Strategic planning | Problem solving | Teamwork | Multitasking | Willingness to explore

SELECTED PROJECTS

01.Driving School Management System - Web and Mobile Applications

React.js | React Native | Expo | Node.js | MongoDB | REST APIs | Railway

- Developed a full-stack web platform and cross-platform mobile application using a shared Node.js backend.
- Applied MVC and 3-tier architecture; built role-based dashboards for Admin, Instructor and Student users.
- Implemented registration, lesson booking and payment tracking, and deployed backend services on Railway.
- Designed RESTful APIs for frontend-backend communication and mobile application integration.

02.Student Course Registration System

Java | Spring Boot | MVC | MySQL | IntelliJ IDEA

- Built a full-stack course-registration system with role-based dashboards, enrolment, scheduling and course management.
- Implemented secure database integration and CRUD operations using MVC and 3-tier architectural principles.
- Developed and tested the application using IntelliJ IDEA.

03.Web-Based NIC Issuing Service

Java | Spring Boot | MVC | SQL | REST APIs | IntelliJ IDEA

- Created authenticated dashboards for Admin, Officer and Applicant roles.
- Implemented NIC applications, document submission, review workflows, status tracking and secure CRUD operations.
- Applied authentication, validation and structured database management using Spring Boot and SQL.

04.Student Course Registration System

Technologies: Java, Spring Boot, Spring MVC, REST APIs, MySQL, IntelliJ IDEA

- Developed a full-stack course registration system using Java and Spring Boot.
- Followed MVC and three-tier architecture to separate the presentation, business-logic, and data-access layers.
- Created role-based dashboards for administrators, lecturers, and students.
- Implemented student registration, course enrolment, timetable scheduling, course management, and enrolment-status tracking.
- Developed CRUD operations for students, courses, schedules, and registrations.
- Integrated a MySQL database for structured and secure data management.
- Added input validation, exception handling, and authentication-based access control.
- Developed and tested the application using IntelliJ IDEA.

05.Interactive Learning Tool for Children – Arduino

Technologies and Hardware: Arduino Uno, Arduino IDE, Embedded C/C++, color sensor, HC-SR04 ultrasonic sensor, IR sensor, LEDs, buzzer, LCD/OLED display, push buttons, servo motor, breadboard, resistors, and jumper wires

- Developed a real-time colour-learning device using a colour sensor, HC-SR04 ultrasonic sensor and IR object detection.
- Integrated LEDs, buzzer, push buttons, LCD/OLED display and servo motor for visual, audio and movement feedback.
- Followed an input-process-output architecture for real-time sensor processing and hardware control.
- Tested sensor accuracy, response time, usability and learning effectiveness.
